- Biomuovi astia
- Biohajoava astia
- Etc.

- **Trademark related:**

- **Words related to other vegetable fiber products:**

- Maissikuitu astiat

Results of the searching

Country/Area	Webpages	Product content clearly illegal
Finland	55	15
Sweden	23	9
Other MS	18	6
Third countries	7	0
Registrant not found	24	14
Total number	127	44

Measures after searching

- The recall measures were triggered in September.
- We informed on the websites of Ruokavirasto that bamboo enforcement action in the EU has started and we in Finland are going to participate of it.
- We informed local inspectors about the results of the search in the extranet, which is for authorities only.
- We also had a web-meeting with them, where we guided in measures needed.
- The local inspectors
 - ensured the withdrawal of the products
 - ensured that business operators removed the bamboo plastic products from their websites.
 - wrote down in the extranet what measures they have done
- Almost all the websites that were found in the search, have already been taken under control and many of the recognized business operators behind the websites have made the withdrawal notification of these products. Some of the measures are still in under process.
- In one case we suspected fraud.
- To date
 - the Finnish operators have made 15 withdrawal of these bamboo plastic products and
 - Ruokavirasto has made 23 RASFF-announcements

Customs role in the bamboo-zling project

- Our Customs has controlled these products in the imports of third countries.
- They have added search criteria to find samples of these products.
- Most of the bamboo plastic products come to Finland from the internal markets of the EU. So to date, no such products have been detected in the imports from the third countries to Finland.

Information to the operators and consumers

Questions and answers
